\*example from a real patient, de-identified

A number line diagram showing a sequence of jumps. It starts at 0, jumps to 7, then to 13, and finally to 19. The jumps are labeled 7mg and 6mg.

So now you've done the basics:

- Reviewed 24h CIWAs/vitals
- Reviewed 24h prn benzo requirements

What about scheduled or additional ordered doses?

Did they get any other benzos (diazepam, chlordiazepoxide, etc.)?

If they came from the ICU/SCU, did the get phenobarb?

How many days have they been withdrawing?

What was their EtOH level when they came in?

Did they have any other substances on Utox?

Have they withdrawn before? What were their needs then?

# How it is now:

\*example from a real patient, de-identified

I have reviewed, updated, and verified this note's content, I have performed discharge services for more than 30 minutes, including follow up with orthopedics, I have performed a history and examination of the patient, I have discussed the management with the resident, and I agree with the attached note's assessment and plan (with the exception of any of my comments indicating otherwise in this attestation note).

### DISCHARGE SUMMARY

#### The Miriam Hospital

#### Discharge Information

Date and time of Admission: 12/30/2020 7:10 AM

Date of Discharge: 01/14/21

#### Discharge Diagnoses:

Principal Problem:  
Alcohol dependence with unspecified alcohol-induced disorder

Active Problems:  
Automatic implantable cardiac defibrillator in situ  
HLD (hyperlipidemia)  
OSA (obstructive sleep apnea)  
Depressive disorder  
Anxiety

Resolved Problems:  
\* No resolved hospital problems. \*

#### Discharge Medications:

##### Current Discharge Medication List
